BSc (Hons) Mathematics

BEng (Hons) Civil Engineering

BSc (Hons) Computing Science

BEng (Hons) Mechanical Engineering

BEng (Hons) Mechanical Engineering
with Transportation

Purpose of handbook

The objective of this handbook is to give you important information about your time as a student at the Dundee International Institute of Central South University (DIICSU), a partnership between the University of Dundee (UoD) and Central South University (CSU). It will give you guidance and advice on matters of teaching, learning, and support that is available to you from the UoD and its School of Science and Engineering (SSEN), and about procedures in DIICSU. The handbook can be regarded as a base of information.

Other sources of information that you will become familiar with include the following:

The website for the SSEN:

dundee.ac.uk/science-engineering/

The Virtual Learning Environment for you to find all your module information is known as 'My Dundee':

my.dundee.ac.uk

In this handbook you will find ...

Welcome from Professor Fordyce Davidson, Dean of the School of Science and Engineering, University of Dundee

As the Dean of the School of Science and Engineering, University of Dundee (UoD), I would like to extend a very warm welcome to you as a student at the Dundee International Institute of Central South University (DIICSU). You have joined a very special programme, which will allow you to graduate from two of the top universities in the World. You will benefit from new ways of learning and engaging with topics that are informed by the research that we do. You will gain practical skills

through project and group work in state-of-the-art laboratories. I hope that you are as excited as I am by the opportunities that the DII creates for us all to work in a multi-cultural environment. We are here to help you reach your full potential. Please reach out to us for support or guidance at any time

As students of the DII, you will have full access to our UoD learning resources and be in contact with your fellow students who work on our campus in Dundee. I encourage you to take every opportunity to engage with them, so all of our students benefit from being part of our multi-cultural community.

As you will find, University life is quite different to being at School – you have more freedom to do what you want, when you want, and more distractions to make it all too easy not to study! To get the best out of your time at DII, you will need to get the right balance between work and other activities. Put the effort into your studies and you will be rewarded with a great degree from two internationally well-respected and highly esteemed universities. This will set you on the right track for an exciting and fulfilling career.

I hope that you will enjoy your time studying with us. If you need any advice or help, please do not hesitate to contact any of the numerous sources listed in this handbook.

**Professor Fordyce Davidson,
Dean & Bell Burnell Chai**

Professor Karen Petrie

Executive Vice-Dean of DIICSU

A warm welcome to all our new first-year undergraduate students at the Dundee International Institute of Central South University (DIICSU)! I'm Professor Karen Petrie, the Executive Vice Dean of the Institute, and I'm thrilled to see you start this exciting chapter of your academic journey.

As a professor in the School of Science and Engineering at the University of Dundee, I've had the pleasure of working in a field I'm incredibly passionate about: computer science. My own academic path led me to a PhD in constraint programming, a fascinating branch of artificial intelligence.

I've seen firsthand how a passion for technology can open doors to amazing opportunities. While on placement for my PhD, I had the incredible chance to work at NASA. This experience led to me being named the young IT practitioner of the year by the British Computer Society (BCS) in 2004. I am currently the Chair of Algorithms and Education at the University of Dundee.

This is just the beginning for you, and I am confident you will achieve great things. I wish you all the very best with your studies, and I look forward to being with you in China. We are excited to support you as you embark on this journey.

K.Petrie@dundee.ac.uk

1 Working together

We aim to work together with students to ensure that you have the best learning experience possible.

Student Executive

Each year, students in our School elect a School President to lead the student voice. They work alongside Vice-Presidents (VPs) representing each course, and Class Reps for each year group. Together, they make sure your ideas and feedback help improve learning and teaching experience for everyone.

DIICSU students elect a Vice President representing the Institute and Class Reps for each class.

Members of the School Student Executive are a part of all the key School committees. This means your feedback goes straight to the academic staff who make decisions.

The School President chairs the School Student Executive, which includes VPs for:

- Biomedical Engineering
- CAHID (Centre for Anatomy and Human Identification)
- Civil Engineering
- Computing
- Graduate Apprenticeships
- Mathematics
- Mechanical and Electronic Engineering
- Physics
- DIICSU

In DIICSU, Class Reps are elected for each class of 30 students. Their roles include:

- Class Representative for Publicity - Responsible for the publicity of cultural activities and events - including getting students to attend activities
- Class Monitor - Responsible for general service to students (attends the Student Staff Liaison Committee [SSLC] as student rep)

- Assistant Class Monitor - Responsible for the safety of students
- Class Representative for Academic Studies - Responsible for building the academic atmosphere (attends SSLC as student rep)
- Class Representative for Welfare - Responsible for making sure dorms are clean and responsible for mental health education
- Class Representative for Arts and Sports - Responsible for organising cultural activities and sports events

Student Staff Liaison Committee

DIICSU has a Student Staff Liaison Committee (SSLC) where Class Monitors and Class Representative for Academic Studies meet with members of the academic staff to raise any issues that you might have about the course you are studying. The student representatives are chosen by the students in their class at the beginning of each academic year, and you should contact them if you have any issues you want to raise at the meetings.

You are welcome to bring up issues with your module leads at any time, so that you do not have to wait for the SSLC meeting before they can be resolved.

Student feedback (UoD Modules)

At the end of the teaching period for each module, a feedback questionnaire will be issued. This might be a paper forms to complete, an online form to submit, or a survey on My Dundee, as well as on the CSU Educational Management System. This means you need to complete TWO questionnaires for each module. Please take some time to give constructive feedback that will be used by the Module Leader to help shape the module for future years. You may also raise points with Module Leaders during the module if it seems appropriate.

Giving informal feedback on your teaching (UoD Modules)

You do not have to wait until the end of the module before giving feedback - either positive or constructive. We are always keen to improve, and you may have positive feedback, suggestions or concerns about a specific module or your course that you would like to raise earlier. Generally, the first person to talk to is your **Module Leader**. For serious concerns, you are welcome to contact the **Executive Vice-Dean**.

If you are not satisfied with a response that you receive, or the service the university provides, you can also make a **complaint**.

2 Help & support

There is a wide variety of places where you can get help within SSEN, the UoD and CSU.

Advice or general help about your degree course	• Student Advisers or Class Mentor from CSU • Adviser of Studies from UoD
Help understanding module content or assessment?	• Ask the lecturer or module lead by talking to them before or after class • Email the lecturer or use Microsoft Teams chat • Use the discussion board for the module on My Dundee.
Advice about University regulations	• Student Advisers at CSU → Xiaozong Wang → Fan Fan → Xianyu Mao → Yang Cao → Yi Zeng → Xu Song • Strategic Partnerships Education Lead at UoD → Tina Robertson trobertson002@dundee.ac.uk
Support for disabilities	• Student Advisers at CSU • Disability Support Services → disability@dundee.ac.uk
Advice for personal problems/general guidance	• UoD China Support Hub
On campus	• Information and Network Centre nic.csu.edu.cn • CSU Online Service Centre ehall.csu.edu.cn/v2/site/index
IT help	• dundee.ac.uk/it

Exam advice	• “Zhi Xin Guan”/知新馆 at CSU • Academic Skills Centre/Tool Kit • Exam Revision Toolkit/ Exam Bites
Assistance with a wide range of academic skills topics, including essay writing, revision techniques etc	dundee.ac.uk/academic skills/students/
To get an official academic transcript	• https://www.dundee.ac.uk/guides/order-official-document-or-letter-registry • examinations@dundee.ac.uk
To get a formal confirmation that you are a student	• https://www.dundee.ac.uk/guides/get-letter-says-i-am-student#formal-letters

You can get help from lots of people, including your Student Adviser, Class Mentor, Adviser of Studies, Programme Lead, Module Leader, Executive Vice-Dean, Vice Deans, Associate Dean for Education and Student Experience, or from any of the academic staff in the DII. Everyone wants you to succeed and will do their best to support you.

Don't wait until problems become too big to fix. If you notice an issue, reach out for help as soon as possible.

You can also ask to speak to staff in confidence. They will respect your privacy if you share personal or sensitive information, such as a mental health difficulty or another disability. Such information would remain confidential and only be discussed with parents and other staff of the University with explicit, informed consent from you, unless there are concerns for your safety, the safety of others, or where the University is required to act by law.

Class Mentor from CSU and Adviser of Studies from UoD

If you need academic advice and guidance or pastoral support, you can go to your Class Mentor or Adviser of Studies. You will be allocated a Class Mentor and an Adviser of Studies on entry. The Class Mentor will normally be an experienced academic or professional services staff member, and the Adviser of Study will be an academic staff member teaching at CSU for your programme.

You can find out who your Adviser of Studies is by contacting the Strategic Partnerships Education Office

SSEN-DIICSU@dundee.ac.uk

You can expect your **Class Mentor** to:

- Meet regularly with you and support your career and personal development planning
- Provide pastoral support
- Provide support in dealing with emergencies
- Give advice on problems about finance and daily life
- Provide direction to relevant sources of support within CSU.

You can expect your **Adviser of Studies** to:

- Give advice on the structure and content of your course of study
- Give advice on dealing with difficulties in taking UoD modules
- Provide support in professional competitions in their related subjects
- Provide direction to relevant sources of support within UoD.

Associate Dean for Education and Student Experience (UoD)

I am Dr Scott Gregory, your Associate Dean for Education & Student Experience. I'm responsible for making sure you have the best possible student experience in our School throughout your time here.

You're welcome to contact me anytime. You can reach me directly through Teams (private chat) or by email. I'm here to support you, help with any issues, and point you toward the right people or services if needed.

I'd also love to hear your good news stories. If a staff member has gone above and beyond for you, let me know so I can make sure they get the recognition they deserve.

Most importantly, I hope you have an enjoyable and successful year.

sgregory001@dundee.ac.uk

Senior Adviser of Studies (UoD)

I am Dr Daniel, your Senior Adviser of Studies. You will all have an individual Adviser of Studies from your discipline who you will have regular meetings with and who is there to provide guidance and advice throughout your studies. My role is to advise all the School of Science and Engineering Advisers so they can support you best. However, I can be your second point of contact for you if your Adviser is unavailable or you don't feel you can speak to them for any reason. I am happy to meet you in person or online. I also love to hear positive stories about how Advisers have helped or

supported you throughout your degree so they can get recognition, and we can all learn from their actions.

ssen-senioradviserofstudies@dundee.ac.uk

Programme Leads

The Programme Leads are UoD academic staff who helped develop the DIICSU degree programmes:

- Civil Engineering
Dr Thomas Dyer t.d.dyer@dundee.ac.uk
 - Computing
Dr Craig Ramsay c.d.ramsay@dundee.ac.uk
 - Mathematics
Dr Niall Dodds n.dodds@dundee.ac.uk
 - Mechanical Engineering and Mechanical Engineering with Transportation
Dr Keith Johnston k.c.johnston@dundee.ac.uk
-

Module Leaders

Each module that you take will have a Module Leader, who is responsible for the content and running of the module. Your Module Leader is the person who teaches you on the module.

The Module Leader will:

- Provide a module guide on My Dundee with teaching aims, objectives, and assessment details.
- Tell you how and when assessments will take place.
- Answer questions about teaching and assessments.
- Make sure you get timely feedback on your assessments.
- Give you chances to share feedback about your experience in the module.

Programme administration (UoD)

There may be times during your studies when you require help and advice that applies to both your course and your personal life. The Strategic Partnership team of SSEN and Academic Affairs Officers of CSU are here to support you and provide guidance where possible. The Project Manager and CSU Academic Affairs Officers are located at CSU and the remaining team members are in Dundee, Scotland. Details on how to contact team members are listed below.

For general enquiries please contact:

ssen-diicsu@dundee.ac.uk

Programme Administration (CSU)

For problems with the timetable, curriculum, and Registry at CSU, you are welcome to contact the Academic Affairs Officer for support.

Zhang Shanshan

shanshan.zhang@csu.edu.cn

UoD China Support Hub

As a world-renowned university, the University of Dundee has always been committed to the development of international education, providing the most comprehensive and complete support and assistance to international students from all over the world. At the same time, we fully understand the difficulties encountered by students such as network connectivity, communication with teachers, and English communication related issues. Because of this, the University of Dundee has set up the UoD China Student Support Hub in China, which aims to provide a comprehensive one-stop service and support for partner universities and students enrolled in a University of Dundee degree program, to solve the problems encountered by our students in the process of studying in China and provide the corresponding support.

The UoD China Student Support Hub is located in Shanghai and covers the full range of services provided by the University of Dundee to students, including IT support, study support, pre-departure guidance and other support, and will provide more valuable advice and services to enhance students' international learning experience. The UoD China Student Support Hub will use Chinese to provide services to students, making it easier for students to contact us. We are proud to support students, and we are proud to support our partners as well. No matter where you are, we sincerely hope that every Dundee student will have a wonderful and unforgettable learning experience.

For more information, please visit our Chinese language website:

[中国学生支持中心 - 邓迪大学中文官网 \(universityofdundee.cn\)](http://universityofdundee.cn)

You can also get in touch with us through the following WeChat QR code:

WeChat - Please scan the QR code below

Disability support officer

Disability Services offers confidential support for students with a disability, including students with physical and sensory impairments, mental health difficulties, and specific learning difficulties.

disability@dundee.ac.uk

dundee.ac.uk/disability-services

All staff are committed to making sure you have full access to teaching and learning if you have a disability. If your studies are affected, the **Senior Adviser of Studies** can liaise with Disability Services and your Module Leads to make sure you are included in every part of your degree programme and that the learning environment does not disadvantage you.

Academic Skills Centre

The Academic Skills Centre provides online resources to help you develop the skills you need to succeed as an undergraduate. All University of Dundee students can access support for building academic skills.

3 Your participation and responsibility in learning

Please check at least once a day

Your University email account

Microsoft Teams

The *Activity Stream* on My Dundee to check for announcements and due dates on modules

Please check in week 1

The UoD modules you are registered for and your personal details that are shown on eVision. If there are any discrepancies, please report these to Strategic Partnerships education team ssen-diicsu@dundee.ac.uk

It is clear from attendance records and module results that those who attend well do well, and those that don't, don't. Being responsible for what you do and when you do is a big challenge for many students. You have a responsibility to keep yourself up to date with what is happening in your modules.

Attendance is very important at DIICSU. Experience shows that high attendance is well correlated with high grades. Grades can be subtracted from students who do not attend. So, DIICSU monitors attendance carefully in all classes. If your attendance falls below 80%, you will have to meet your student advisor to explain why and receive any necessary support.

For UoD Modules, the information can be found on the My Dundee website, and through the Blackboard Mobile app. Notices and information about your modules, including timetable changes, assessments and course changes, will be posted on a day-to-day basis on My Dundee, and in some cases by email. Please make sure that you check the Activity Stream and announcements page for each module on My Dundee and your UoD email account **at least once a day** so that you do not miss anything important.

For CSU modules, please check the information posted by the lecturer.

How you should participate

Participation in **all** the activities on each module is crucial if you are to make the most of your time at University. You should attend all teaching activities – lectures, tutorials, labs, etc. With the pace of teaching in the semester system, you may find it very difficult to catch up if topics are missed. We would advise you not to take on employment which requires you to miss lectures and/or all or part of practical classes. If you do get into problems with your academic work, then you must seek help as soon as possible.

If you do get into problems with your academic work, please seek help as soon as possible.

Freedom of expression

A University is a place of debate. It provides an environment for the free exchange of ideas and for the questioning and exploration of those ideas in the pursuit of truth and knowledge. Sometimes ideas can seem shocking, and long-held views can feel under threat; but this is an essential part of academic discourse, refining hypotheses and deepening understanding. Universities also play an important role in contributing to wider public debates, sharing the results of the research and expertise of their academics for the benefit of wider society.

Members of a University community must regularly expect to confront difficult and controversial topics or views, expound their own ideas, and engage with disagreement and dissent. Sometimes ideas will align with our own views, sometimes they may seem objectionable or disagreeable, but to challenge others' views and be open to challenge of one's own views is a fundamental part of what it means to belong to an academic community. Students are as much a part of this community as academics, teachers, and researchers.

Staff and students must recognise that such debates are an important part of education, and everyone is expected to engage inclusively, civilly, and peacefully, recognising that this can be uncomfortable for some but understanding that by tackling divisive issues, we can achieve great things and push the frontiers of knowledge. However, just because the University promotes freedom of expression does not mean that members of the community must tolerate abuse, threats, hatred, discrimination or violence or any other unlawful

acts. By the same token, the holding of an unpopular viewpoint does not by itself necessarily represent abuse, hatred, or discrimination.

Freedom of expression brings with it a responsibility to consider both the means by which and the environment within which ideas and opinions are raised. Being sensitive to one's audience and thinking about how opinions and questions are phrased are extremely important if we are to initiate discussions sympathetically and inclusively. The very acts of raising a question or voicing an opinion can themselves feel hostile in some situations, so we need to be fully aware of that and take active steps to reduce the opportunity for offence.

When we disagree with points of view, we sometimes feel the need to protest openly about them. This, too, is a form of freedom of expression. But protests can be intimidating, and so we should consider how we can protest in ways that encourage debate and reduce the risk of making members of our community feel unsafe or vulnerable.

In Universities, the term academic freedom is also used to protect the rights of members of staff engaged in teaching, learning and research to exercise intellectual independence as well as to express themselves freely. Ordinance 59 of the [University's Ordinances](#) sets out the University's commitment to protecting academic freedom, as well explaining how staff can make representation in the event that they believe their academic freedom has been adversely affected. In accordance with the Higher Education Governance (Scotland) Act 2016, the University defines academic freedom in the following terms:

- Academic freedom [...] is the freedom to hold and express opinions, question and test established ideas or received wisdom, develop and advance new ideas or innovative proposals, and present controversial or unpopular points of view, without placing oneself in jeopardy of losing one's job, entitlements, or privileges, provided always that such freedom is exercised lawfully and respects the academic freedom of others. [Ordinance 59, §1]

The University encourages all within its community to reflect on the principles of free expression set out here so that together we can fulfil our mission to transform lives by creating researchers, teachers, students, and graduates who are respectful of others when expressing their views, accept others' rights to freedom of expression within the law, and are confident and resilient enough to engage with difficult topics.

Academic year

The academic year is divided into two teaching semesters. Semester dates and exam periods for the current and future academic years can be found on the CSU website:

csu.edu.cn

Please take note of the periods when examinations are scheduled, because you will be expected to be available to attend examinations throughout the exam period. It is therefore important not to plan to travel or to be away from campus at any point during this time.

Class timetables

Class timetables can be accessed at your CSU Educational Management System.

What if you don't participate?

We believe that attendance is important to your ability to succeed, and failure to attend and participate in labs, tutorials and assessments may indicate that there are underlying problems which are affecting your studies. Failure, either to attend this meeting or to restore full participation immediately, may lead to you being unable to progress sufficiently through your degree and could result in your studies being terminated.

Non submission of coursework can also mean that you will fail that module. Coursework is assessed in "Module Assessment Bodies" (MABs). These may be single items or groups of coursework or an examination. In some modules you will be required to get at least a qualifying mark (i.e. a minimum grade) for some or all MABs. Your Module Leader will provide information on qualifying marks via the My Dundee module page.

Reporting absences due to ill health

If you are absent from a class, you must complete a paper **Absence Form** to record this and submit it to your CSU Student Adviser.

Absences from all assessments of UoD modules **must** be reported via the mitigating circumstances process to be taken into consideration.

Reporting mitigating circumstances

Mitigating circumstances (MC) describe situations that temporarily prevent you taking an assessment or significantly impacts your performance in an assessment or examination. These are circumstances beyond your control and can include serious or incapacitating injury, bereavement affecting a close family member, or severe weather affecting travel.

If you need to submit an MC form, the following steps will take place:

- The MC form and evidence will be reviewed by the School MC Committee. Students do not attend the committee.
- The School MC Committee reviews the evidence, the effect of the event, the timing of the event, and performance.
- MCs are considered under four categories: Severe, Significant, Mild, or No Case.
- Severe, Significant or Mild cases means action will be based on overall academic performance and severity of the case. No case means no further consideration and no action is taken.
- The School MC Committee makes a decision based on overall performance and passes the information to the Exam Board, e.g. no change, additional opportunity, first attempt, condonement or compensation, or mark adjustment.
- The Exam Board ensure that the recommendation has been implemented. Students are informed by the School Office of the outcome, any action to be taken, and support available.

We will write back to you after the Exam Board with the outcome of any mitigating circumstances submission.

To apply for mitigating circumstances you should download and complete the form: **Mit Circ Form DIICSU.docx**. You should then submit this as an email attachment, accompanied by the appropriate evidence, to **ssen-diicsu@dundee.ac.uk** only (please do not copy others into your email). Please include in the subject heading of the email '**Mitigating Circumstances - Private and Confidential**'.

The following is an example of a completed mitigating circumstance form so that you can see what is expected: **Mit Circ Form DIICSU - Completed.docx**.

Extensions for submitting assessments

You can request a short extension of up to five days for an assessment, and up to two weeks for dissertation modules. It is not possible to offer extensions for some assessments, including in person class tests or short quizzes that take place during class time.

To find out more about how to request an extension, then please email **SSEN-DIICSU@dundee.ac.uk** to ask for it.

All extension requests must be submitted via email. Individual lecturers cannot offer extensions.

If you require an extension of longer than five days, or if you will miss an exam, then you will need to complete the mitigating circumstances application.

4 Assessment (UoD modules)

This Handbook should be read in conjunction with School Undergraduate Degree Regulations for DII programmes, which set out what is required for you to progress with your studies.

Please note that the assessment information in this handbook applies to your UoD modules only. For your CSU modules, please refer to the CSU regulations about assessment.

Assessment of modules in the curriculum will be by coursework, class examination and degree examination, or a combination of these elements. The grade required to pass in each module is normally D3. Details about assessment for each individual module is provided in the module guides available in My Dundee.

You should make sure that you understand the proportion of marks assigned to the various elements of assessment so that you give each element the appropriate effort. **That level of effort is likely to be significantly greater than you will have experienced previously.**

All assessed elements of Science and Engineering modules are graded in accordance with the UoD's Assessment Policy.

dundee.ac.uk/corporate-information/assessment-policy-taught-provision

All assessments are marked on the University of Dundee Assessment Scale:

dundee.ac.uk/corporate-information/assessmentscales/

Programme aims and descriptions

The five programmes offered by the DII, namely, BEng (Hons) Civil Engineering, BEng (Hons) Mechanical Engineering, BSc (Hons) Computing Science, BSc (Hons) Mathematics, and BEng (Hons) Mechanical Engineering with Transportation, aim to provide you with the necessary academic background and tools to enable the

development of your professional skills in your subsequent careers, including the knowledge and understanding of the key principles, confidence in the use of common tools and methods, skills in solving problems, ability to communicate effectively verbally, graphically and in the written word, etc. For further information please refer to the programme specifications available on My Dundee.

my.dundee.ac.uk

Coursework

Coursework will be set in modules such that it is reasonable to expect you to complete and submit the work by the submission date. Please take note of feedback and try to build on this in subsequent coursework.

Coursework should be submitted electronically via My Dundee. By submitting the coursework, you are agreeing to your work being automatically checked for plagiarism and then stored electronically for future comparison with work submitted by other students at the University of Dundee. Your work will only be used for storage and comparison purposes and will be stored for this purpose indefinitely.

Please refer to the University Assessment Policy for details about assessment, including penalties for late submission at:

dundee.ac.uk/corporate-information/assessment-policy-taught-provision

Group and peer assessed work

Where modules include group and peer assessed work, this information will be made available to students either by the Module Leader or the relevant module content folder in My Dundee.

Non-assessed work

You should be aware that some modules may require you to complete some non-assessed work that is vital to your success in the module. This may include participation in tutorials, practical's, seminars, workshops, and site or industrial visits. You are advised that participation in such non-assessed work may be a requirement for completion of the module in the same way as assessed work.

Examinations

It is your responsibility to find out when and where each examination is taking place.

→ Examination Timetables

All examinations take place at the time and location published in the timetables.

Please take care when booking holidays and travel arrangements to make sure you are at CSU at the time of the examinations.

→ Calculators

All scientific calculators that do not have graphing functionality are allowed to be used in examinations. Below are some examples of allowable calculators.

Module Marks

The module guide will specify the contribution of any assessment item to the final module mark.

In some circumstances individual pieces of work are marked in percentages. In these cases, alphanumeric grades are derived from the percentages before marks are combined. The final calculation of the overall module grade will be based on the aggregation of marks for each element. An example of this might be:

Module A has two items of assessment:

- Project worth 40% of the overall grade
- Degree examination worth 60% of the overall grade

If a student receives an 'A1' for the project (which is 23 on the aggregation scale) and 'B3' for the degree exam (which is 16 on the aggregation scale), this overall grade is calculated as below:

Project: $23 \times 40\% = 9.2$

Degree exam: $16 \times 60\% = 9.6$

Total = 18.8 which is rounded up to 19 (which is an A5 on the alphanumeric scale). The overall grade for Module A is 'A5'.

dundee.ac.uk/corporate-information/assessment-scales

The grading system used for modules by UoD and CSU are different. When you receive your grade for a UoD module you will see an alphanumeric scale on eVision.

Module mark conversion table

The following table shows the equivalent grade for each university so from this table you can assess what your equivalent Chinese grade will be.

UoD alphanu meric grade	UoD Associated aggregation scale	China Grade (used when converting from UoD grades)	China Grade Range (used when converting from CSU grades)	Descrip -tor	Honours Class
A1	23	99	99	Excellent	1st
A2	22	98	98		
A3	21	97	97		
A4	20	96	94-96		
A5	19	93	89-93		
B1	18	88	86-88	Very Good	2(i)
B2	17	85	83-85		
B3	16	82	79-82		
C1	15	78	76-78	Good	2(ii)
C2	14	75	73-75		
C3	13	72	69-72		
D1	12	68	66-68	Sufficient	3rd
D2	11	65	63-65		
D3	10	62	60-62		
MF1	9	59	54-59	Marginal Fail	
MF2	8	53	49-53		
MF3	7	48	39-48		
CF	5	38	15-38	Clear Fail	
BF	2	14	0-14	Bad Fail	
*QF	9	59	N/A	Qualifyin g Fail	

* QF indicates that a student has not met the conditions required to have obtained an overall pass.

Results

The provisional results of semester one modules, including resit examination results will be available on eVision in January or February, but these will not be confirmed until after the Board of Examiners meetings are held in the summer. The official results of both semester one and two examinations will be published on eVision in June or July after the meeting of the Board of Examiners. The results of resit examinations of modules in semester two will be published in September. No results will be given over the phone.

CSU: [ca.csu.edu.cn/authserver/login? Service](https://ca.csu.edu.cn/authserver/login?Service)

UoD: evision.dundee.ac.uk

Examination boards

At the end of each academic year, your performance is scrutinised by a board comprising academics from the relevant course and at least one external examiner who is an academic from another University. In addition to the power to decide the overall degree classification, these boards have the power to revise the grade you have achieved for a particular module.

Degree classification

Completion of the BEng (Honours) and BSc (Honours) courses requires satisfactory completion of all assessment components. For information on the calculation of degree classification, please refer to the University Assessment Policy.

dundee.ac.uk/corporate-information/assessment-policy-taught-provision

Prizes and awards

There are a number of prizes available to students in the School for outstanding achievement; such prizes are considered to be a valuable addition to your CV. The award of prizes is decided and approved by the Board of Examiners and/or the School Prize Committee.

Plagiarism and academic misconduct

Plagiarism and other kinds of academic dishonesty are considered cheating and will be punished severely. If there's evidence, disciplinary action will follow. Penalties can range from a warning letter or reduced marks to having to appear before the University Disciplinary Committee.

You do have the right to appeal any penalty decisions. For full details, check the Code of Practice for Academic Misconduct.

dundee.ac.uk/corporate-information/code-practice-academic-misconduct-students

Examples of plagiarism and academic dishonesty (all of which are unacceptable) include:

- **Improper influence** – trying to sway an examiner or staff member, such as offering bribes, asking for special treatment, or making threats.
- **Cheating in exams** – copying from another student, talking to someone during the exam, using unauthorised notes or devices (like smartwatches or phones).
- **Collusion** – submitting collaborative or group work as if it were your own or using another student's draft without credit.
- **Commissioning** – handing in work done by someone else, whether you paid for it or not (also called contract cheating or ghost writing).
- **Duplication** – reusing your own previously submitted work (or parts of it) for another assessment.
- **False declarations** – lying to a committee (e.g., about mitigating circumstances) to gain an unfair advantage.
- **Falsifying data** – inventing, altering, or exaggerating data and pretending it's genuine.

- **Personation** – pretending to be another student (or letting someone pretend to be you), e.g., sitting an exam on their behalf.
- **Unauthorised AI use** – using generative AI tools or websites when you're not allowed to.
- **Plagiarism** – using another person's work without proper credit. This includes copying phrases without quotation marks, paraphrasing with only small changes and no acknowledgement, copying entire sections, or using someone else's ideas without referencing them.

To avoid problems with referencing, always follow the Referencing Code of Practice. You must also avoid breaking copyright rules – see the Student Code of Practice for Copyrighted Material for more details.

[dundee.ac.uk/corporate-information/referencing-code-practice-students](https://www.dundee.ac.uk/corporate-information/referencing-code-practice-students)

<https://www.dundee.ac.uk/corporate-information/student-code-practice-copyrighted-material>

You have the right to appeal penalty decisions.

Academic appeals

If you wish to make an appeal about the decision of a Board of Examiners, you should in the first instance seek a resolution of your decision with the Vice Dean of CSU and Executive Vice Dean of UoD. You should do this by writing to the DIICSU Strategic Partnerships Team (ssen-diicsu@dundee.ac.uk) once you have been informed of the decision of the examiners. You can appeal to the Vice Dean and Executive Vice Dean on one or more of the following grounds:

- There were extenuating circumstances which affected your performance of which the examiners were unaware when their decision was taken, or
- There were procedural irregularities (including administrative error) in the conduct of a written or oral examination of such a nature as to give rise to reasonable doubt whether the examiners would have reached the same conclusion had they not occurred, or
- There was prejudice or bias on the part of one or more of the examiners.

If the matter cannot be resolved to your satisfaction with the Vice Dean and Executive Vice Dean, then you can follow the Senate Undergraduate Appeals Process, which is explained fully at the following link:

<https://www.dundee.ac.uk/governance/discipline-complaints-appeals/appeals>

You can also contact DUSA who offer advice on the process of appeals:

dusa.co.uk/advice/academic

Appeals to the Dean are usually considered within a 2-week period although more complex cases may take longer to resolve. If an appeal is likely to take longer than 2 weeks to resolve, then the School will communicate this to the student within the first 2 weeks.

English for international students

Modules DI11001 English for Academic Skills I and DI11002 English for Academic Skills II run in year one, semester one and semester two.

You will be taught the skills you need to help you move from secondary school to university, and from Chinese to UK academic style. You will focus on skills such as listening for details in lectures, paraphrasing for reading and writing, and agreeing/disagreeing politely to help in class discussions.

To practise outside of class, you will have homework to complete. There will also be optional, extra work each lesson if you feel you need more practice in an area.

Assessment

You will be assessed at the end of the semester. Assessments will include reading tasks, listening tasks, presentations, and academic writing tasks.

Reading and listening tasks will be marked and then discussed in class to help you see where you need to improve. You will receive individualised feedback on your speaking and writing to target your errors so you can improve for the final assessment.

You will have final assessments at the end of semester one, but these will not impact your final UoD grade for the year. They will impact your CSU grade. They are to help us track your progress and identify students who will need extra help to pass the exams at the end of semester two.

Attendance

You are expected to attend 100% of your classes. This means:

- Not being late
- Actively participating in class
- Completing homework tasks.

If you cannot attend, you should inform your CSU Student Adviser as soon as possible.

Communication

We will be using three primary methods to communicate with you:

- **My Dundee**
On My Dundee you will find an overview of the modules and additional resources to help you study.
- **University of Dundee email**
You must check your email every day for notifications, updates, and other information. Your teachers will communicate directly via email – not WeChat.
- **Teams**
You must check Teams every day for notifications, updates, and other information.

If you have questions or concerns about the English for Academic Skills modules, feel free to send an email to:

- Head of English
Charlotte Mahoney cmahoney001@dundee.ac.uk

English language proficiency

If you fail the English modules at the end of year one, a Summer School is available to support you to improve your English proficiency. If you fail any

element of English (reading, listening, speaking, or writing) you **must** attend the Summer School in Changsha over the summer. At the end of the Summer School, you will take a resit examination. Failure after resitting will lead to retaking the English module and not progressing to the second year of study.

5 Progression through your course

Progression through the degree courses is dependent upon your satisfactory completion of each assessment component for every module in each level.

Resitting modules

If you fail a module, you are required to take the resit at the beginning of semester 2 for semester 1 modules or in the summer for semester 2 modules. The resit of the English module in semester two of year 1 will take place at the end of the Summer School. The resit examination timetable will be published in CSU Educational Management System.

Any pass at resit will be capped at a D3 regardless of the weighted average mark obtained.

Failure in modules after resits

If you do not pass a module at resit, you are not normally allowed to progress to the next year of study and will have to repeat the year. However, this is at the discretion of the Exam Board. The Exam Board may choose to allow you to progress carrying the module, remark a module to D3, or compensate or condone a failed module to allow you to proceed with your studies.

Exam board discretion is the authority granted to university examination boards to make flexible decisions on a student's final marks or progression, particularly when there are **mitigating or extenuating circumstances**. This is a key part of the quality assurance (QA) system in the UK, ensuring that academic standards are maintained while also allowing for fairness and compassion in individual student cases.

The **Quality Assurance Agency for Higher Education (QAA)** is a core part of the UK's quality system. It sets out the national expectations for academic standards and quality through the UK Quality Code. While the QAA doesn't directly manage individual student cases, it ensures that universities have robust and fair processes in place, including for how their exam boards exercise discretion.

Here are some examples of how an exam board might use its discretion:

- **Raising a Borderline Grade:** A student might be just a few marks short of a higher degree classification, such as a 2:1. If the student has submitted evidence of mitigating circumstances—for example, a serious illness that affected their performance during the final exams—the mitigating circumstances committee might recommend to the exam board to use its discretion to award them the higher classification, provided their overall profile of marks supports the decision.
- **Allowing Progression:** An undergraduate student might fail a single module with a marginal failure but have a strong academic record otherwise. The exam board might use discretion to allow the student to progress to the next year of study carrying the failed module. This is typically done if the student has met the overall credit requirements for the year and the failed module is not a prerequisite for a module in the next year of study.
- **Waiving a Penalty:** If a student is late in submitting coursework due to a documented mitigating circumstance—like a family bereavement or an unexpected hospital visit—the mitigating circumstances committee can recommend to the exam board to use its discretion to waive the late submission penalty, allowing the student to be marked as if the work was submitted on time.

In all cases, the exercise of discretion is carefully minuted and must be justified and discussed at the board of examiners meeting. This ensures that decisions are fair, transparent, and consistent with the university's regulations and the broader standards set by the UK's quality assurance framework.

Remarking to D3, can be used for marginal fails where the Exam Board are satisfied that you have shown enough ability in the learning outcomes to be allowed to be given the credit for the module and to proceed.

Compensation is the process by which the Exam Board may decide that your strong performance in one part of the curriculum may be used as the basis for the award of credit in respect of marginal failure elsewhere. For example, if you

fail Calculus I but then pass Calculus II, the Exam Board may compensate Calculus I as you have shown you can pass the more advanced variant of the module.

Condonement is the process by which a Exam Board, in consideration of your overall performance, decides that without incurring a penalty, a part of the programme that has been failed need not be redeemed.

The maximum amount of condonement and compensation permitted is 25% (30 credits) for each of the stage that contribute to the honour's degree classification (Levels 3 and 4). There is no prescribed limit at level 1 and 2, but 25% would be normal. Condoned modules are not graded and do not contribute to the final degree classification.

Where compensation is applied, the compensated mark will contribute to the final Dundee degree classification. It will still be in the GPA for the CSU degree. A degree with honours cannot be awarded where there are failed modules that have not been condoned or where compensation has not been applied.

You cannot apply for condonement and compensation as this is at the discretion of the Exam Board. However, if your studies have been adversely affected by extenuating circumstances outside your control, you can make a **mitigating circumstances application**. The Mitigating Circumstances Committee may then apply condonement or compensation to the module.

Pre-requisite modules

Civil Engineering

MODULES		PREREQUISITE	
Level 1			
DI11002	English for Academic Skills II	DI11001	English for Academic Skills I

What if it all goes wrong?

Occasionally, for reasons outside your control, you may find it difficult or impossible to dedicate the necessary time to your studies. If this should unfortunately happen to you then you should let your Student Adviser know as soon as possible. Various options are available to you which will, in serious cases, include discounting the year of study. If you do not notify DIICSU of your situation, you may find that you receive notices concerning non-attendance. It may lead to you being unable to progress sufficiently through your degree which could result in your studies being terminated. All of these may cause further anxiety when it is not needed.

If you find that the programme does not suit you at all and you do not wish to continue at DIICSU, then you should contact CSU and formally withdraw from the programme.

Programme Transfer

Transfers may be permitted between programmes. Details of application can be found at the website of DII.

Termination of studies

CSU procedures are followed under these circumstances. Please refer to the degree regulations for details.

6 Getting involved

Centre for Entrepreneurship

The Centre of Entrepreneurship helps students to become more employable and to explore the setting up of their own business by developing transferable enterprising and entrepreneurial skills. The Centre runs over seventy free events a year ranging from competitions and lectures to workshops and networking.

dundee.ac.uk/entrepreneurship

Careers Service

Life after university may still seem like a long way off, particularly if you are just starting, but it is never too early to start planning your career - and you may find you are too busy with exams/ dissertations come final year. The Careers Service can offer you more than just help with deciding on a future career. They can help you with decisions you have to make right now, such as which subjects to study and whether to get a part time job.

Trained Careers Advisers can offer you a confidential interview to help you explore your interests, skills, and abilities at any time during your studies. In addition, an information room contains a wealth of information and is open to all students.

dundee.ac.uk/careers

DUSA

Dundee University Students' Association (DUSA) aims to provide the highest level of social, recreational, advice and support services to all members, irrespective of age, gender, background, or beliefs.

DUSA aims to assist its members both to enhance their experiences of being a university student and to gain the highest possible quality of education by

providing opportunities to volunteer and make valuable use of their free time to help benefit themselves and others.

As a student-led organisation, DUSA aims to respond to the needs of its membership promptly and effectively and to openly welcome and encourage their contribution to the workings of the Association.

dusa.co.uk

Professional institutions

The organisations listed below are the professional bodies and learned societies that regulate and oversee education and training in the subjects taught in our School. We encourage you to join one as a student member, which provides benefits like access to regular professional journals.

You can find out how to join online or by contacting the academic staff listed below.

CAHID

Anatomical Society
Royal Anthropological Instituted

Craig Cunningham
Catriona Davies

Computing

BCS, The Chartered Institute for IT

Dr Michael Crabb

Engineering

Institution of Civil Engineers (ICE)
Institution of Engineering & Technology (IET)
Institution of Mechanical Engineers (IMechE)
Institution of Structural Engineers (IStructE)

Dr Moray Newlands
Dr Markus Pakleppa
Dr Wattala Fernando
Dr Leon Chernin

Mathematics and Physics

Institute of Physics (IOP)
Institute of Mathematics and its Applications (IMA)

Dr Scott Gregory
Dr John McDermott

7 Student resources

UoD My Dundee

Our School uses My Dundee for teaching, learning, and communication about your modules. Your learning materials will be available there.

my.dundee.ac.uk

Microsoft Teams

The School uses Microsoft Teams for online meetings, updates and discussions, including general discussions on School and University activities, as well as those about your course. This is a good place to ask any questions related to your studies and to meet other students and staff.

DIICSU All Staff and Students

eVision

Through eVision, you can access many useful resources including:

- Matriculation (Registration)
- My Student Profile (*where you can view general finance details, module information, and Adviser of Studies details*)
- My Academic Summary (*where you can view current and previous years' results*)

evision.dundee.ac.uk

University website

General information can be accessed at the University website. Click on “Students” to obtain extensive information about and links to:

- Email, eVision, My Dundee
- Study and Personal Transferable Skills
- Student Services (including Health and Well-being)
- Self-help and Information Leaflets
- Information Resources and Facilities

dundee.ac.uk

Student Terms and Conditions that apply to all students at the University of Dundee

dundee.ac.uk/corporate-information/student-terms-and-conditions

University’s Quality and Academic Standards

dundee.ac.uk/quality-framework/quality-and-academic-standards

Library services

Your Module Lead will expect you to use textbooks, journals, and other resources to deepen your understanding and help with coursework. The Library gives you access to a huge range of material (online and in print), including books, journals, and reports.

You can access electronic resources from anywhere, on or off campus, using your University username and password.

The Library also runs orientation visits during matriculation week, and it’s strongly recommended that you attend one. If you ever have issues, Library Services provide 24/7 support.

dundee.ac.uk/library

The University app is available for download by searching “University of Dundee app” on your app store, or on the University webpage

dundee.ac.uk/guides/university-dundee-app

8 Raising concerns

You may, during your university stay, have concerns, or experience difficulties in a variety of contexts. Please be assured that we are committed to assisting any student under these circumstances.

Complaints

If something goes wrong or you are dissatisfied with our service, please tell us. We regard a complaint as any expression of dissatisfaction about our action or lack of action, or about the standard of service provided by us or on our behalf. How we will respond to a complaint is set out in our Complaint Handling Procedure.

Difference between an academic related complaint and an appeal

An **academic related** complaint is a specific concern about the provision of a programme of study or related academic service, including teaching and academic facilities.

An **appeal** is a request for a review of the decision of an academic body charged with making decisions on student progression, assessment and awards etc. You can find out how to make an appeal in [section 4](#).

How do I complain?

It is preferable to raise your complaint via our online complaints form.

uod.ac.uk/academic-corporate-governance-complaints-form

However, we will accept complaints in person at any of our offices, by phone, in writing or, by email. It is easier for us to resolve complaints if you make them quickly and directly to the service concerned. Where possible, your concerns should be raised with the relevant staff member, tutor, university representative or School Education Office. They will try to address the issue. A guidance document has been produced and contains all the information you need to make a complaint.

dundee.ac.uk/guides/complaints-handling-procedure-guide-students

Safeguarding

The University has a legal obligation of safeguarding which applies to members of its community. Safeguarding covers, to a greater and lesser extent, depending on the context:

- promoting the health and wellbeing of all members of our community
- protecting members of our community from harm
- addressing any concerns raised

A safeguarding concern could arise when:

- an individual is being subjected to, or is at risk of, abuse, neglect or harm
- an individual is, or is at risk of, being radicalised
- an individual has abused, neglected or caused harm to someone else
- an individual's behaviour is considered to be a serious issue.

The University has created a new online form to allow any student or member of staff to raise any concerns that they have about any other member of the University community. This is an anonymous procedure, and the reporting form is available at:

dundee.ac.uk/governance/discipline-complaints-appeals/safeguarding

Issues can also be raised via safeguarding@dundee.ac.uk (not anonymous).
